SUMMARY

Computer Science undergraduate passionate about software engineering, with hands-on experience in full-stack development, AI-powered applications, and open-source contributions. Strong foundation in Data Structures & Algorithms, OOP, DBMS, and Operating Systems, with a proven ability to build scalable, production-ready applications.

SKILLS

Languages Java, JavaScript, Python, C, HTML5, CSS3

Tech Stack React.js, Node.js, Express.js, Firebase, Firestore, MySQL, REST APIs, Git, GitHub, Postman

Concepts Data Structures & Algorithms, OOP, DBMS, Operating Systems, Authentication, API Integration, Version Control

PROJECTS

Currencio AI

[Live Demo](#) | [GitHub](#)

React.js, Node.js, Express.js, Firebase, Groq LLaMA API, Recharts

- Developed an AI-powered personal finance platform using React, Express.js, Firebase, and Groq LLaMA 3.3 featuring expense tracking, analytics dashboards, multi-currency support, and intelligent financial assistance.
- Integrated Groq's LLaMA 3.3-70B through a secure Express proxy with prompt engineering, server-side rate limiting (10 requests/15 minutes), and automatic retry logic using a 2-second exponential backoff.
- Optimized application performance using `useMemo`, interactive Recharts dashboards, and CSV export functionality for monthly spending analytics.

AI-Powered Farmer Assistance App | *React.js, Node.js, MongoDB, AI APIs* Smart India Hackathon 2025

- Led front-end development for a 5-member team, delivering a fully functional React application in under 20 hours with zero merge conflicts and reducing AI query latency to under 3 seconds.
- Developed AI-assisted modules for crop disease detection, irrigation planning, weather guidance, and agricultural decision support.

CTC Decoder | *HTML5, CSS3, Vanilla JavaScript*

[Live Demo](#) | [GitHub](#)

- Developed a responsive salary analysis platform to calculate take-home pay using CTC, tax deductions, PF contributions, bonuses, and variable pay.
- Built interactive compensation breakdown dashboards and offer comparison tools using modern CSS, Flexbox, and Grid layouts.

EXPERIENCE

Open Source Contributor

May 2026 – Present

GirlScript Summer of Code (GSSoC 2026)

- Merged **5+ pull requests** across 3 repositories using feature-branch Git workflows, PR reviews, and issue tracking; passed all maintainer code review cycles with **zero regressions**.
- Resolved **15+ reported issues** across expense tracker, profile finder, and dashboard projects by diagnosing root causes and applying targeted fixes per open-source contribution standards.

ACHIEVEMENTS

- Selected for the **Google Student Ambassador Program (GSA) 2026** after clearing the screening and interview process.
- Solved **80+** Data Structures & Algorithms problems on LeetCode while maintaining a **50-day coding streak**, demonstrating consistent problem-solving practice.

EDUCATION

B.Tech in Computer Science Engineering, GITAM Deemed University

2024 – 2028

CGPA: **7.8/10** — Latest Semester GPA: **8.56/10**
